2020 RES-429
2021-2023 DANE COUNTY LEGISLATIVE AGENDA

General Principle

The state shall foster equitable and inclusive opportunities for all state residents by supporting and funding proactive, evidence-based programs and policies that advance the elimination of racial and socio-economic disparities and recognize the unique role counties play in administering state programs by:

1. Fairly sharing responsibility with the counties in determining the scope, design, and cost of statewide programs;
2. Providing adequate and predictable shares of funding for state services delivered by the counties;
3. Helping counties reduce the need to rely on property taxes; and
4. Enhancing the ability of counties to more effectively manage county government.

In furthering these principles Dane County will assess policies via an analysis that asks:

Who benefits?

Who is burdened?

Who does not have a voice at the table?

How can policymakers mitigate unintended consequences?

Surface and Ground Water Quality

- **Water Quality:** Maintain DNR funding for water quality planning and watershed projects. Seek a fair share of state funding for inland waterways and lakes. Target state funds to where there is a high likelihood of project success, where recipient units of government have a proven track record of meeting state and local water resource goals. Support additional funding and staffing for local water quality protection and improvement.
- **Stormwater Utility:** Amend WI Stats. to allow counties to create and manage stormwater utility. Support local control of erosion and storm water management standards. Oppose standardizing regulation of construction site erosion, storm water management, and prohibiting local governments from enacting local ordinances that are stricter than statewide standards.
- **Comprehensive Approach to Control Lake Levels:** Support a comprehensive approach to managing the levels of the lakes through collaboration with affected parties including dam operators, municipalities and regulatory agencies toward improving natural hydrologic conditions and habitat. Support efforts to manage the Yahara Chain of Lakes by improving the volume of water leaving the Yahara River system, reducing stormwater runoff volumes through increased stormwater infiltration, and improving management of stormwater on impervious surfaces.

- **Keep Asian Carp Out of Wisconsin Waterways:** Urge DNR and federal government to increase efforts to stop the advance of Asian carp in Wisconsin.
- **Mining Reform:** Support provisions restoring local government role for mining and suspend floodplain rules that would nullify flood insurance and federal disaster assistance.
- **Water Management:** Support local governmental efforts to improve water management through water conservation, a balanced water budget, and enhanced groundwater recharge.
- **High-Capacity Wells:** Support science-based regulation of high-capacity wells that considers the individual and cumulative effects of high-capacity irrigation wells on nearby water systems.
- **Public Trust Doctrine:** Oppose legislation that erodes the Public Trust Doctrine and DNR’s ability to regulate navigable waters and wetlands.

Natural Resources Conservation

- **Stewardship Fund:** Support ongoing appropriations for the state Stewardship Fund that are strong and annually adjusted for inflation. Eliminate Stewardship Fund requirements for hunting and trapping.
- **State Urban Forestry Grants:** Allow towns, counties, and non-profits to access both federal and state funds in the Urban Forestry Grant Program.
- **DNR Staffing:** Support DNR staff levels that benefit Dane County water programs, including regulatory programs, lake/fishery, runoff specialists, conservation wardens, land conservation, and parks programs.

Sustainable Agricultural Practices

- **Soil & Water Resource Management Program:** Increase available cost share funding to support agricultural producers with implementation of conservation practices to grow the state’s agricultural economy as well as protect soil and water resources. Develop a new, sustaining revenue source to fund soil and water conservation programming in Wisconsin to assist agriculture with mitigating, adapting, and building resiliency to climate change.
- **Soil Erosion:** Support full implementation and funding of the state’s water quality programs and established runoff pollution performance standards for agriculture, non-agriculture, and transportation facilities standards.
- **Nonpoint pollution:** Target landowner cost-sharing toward implementing existing agricultural nonpoint pollution performance standards (NR 151) with a goal of statewide compliance by 2035. Support ensuring adequate funding is available to meet cost-share requirements to implement performance standards and prioritize systematic implementation of agricultural performance standards and targeting resource concerns.
- **Foreign Interests in Farmland:** Oppose legislation that removes limits on foreign ownership of Wisconsin agricultural land.
- **Non-Therapeutic Use of Antibiotics in Livestock:** Support statewide ban on non-therapeutic use of antibiotics in livestock production/agriculture.
- **County Conservation Staffing:** Support increasing state aid for county

104 conservation staff to fully implement county land and water resource
105 management plan and provide technical support to implement farm
106 conservation practices.
107 • **Nutrient management planning:** Support legislation to increase farm
108 participation in nutrient management planning by improving delivery
109 mechanism and compliance incentives for all Wisconsin farms, especially

112 compliance.

121 change.

123 incentives for counties to produce a resilient climate change-ready
124 economy and carbon-free future by developing, creating and attracting
125 green job opportunities.
- 126 • **Renewable Energy:** Support legislation and statewide funding that
127 encourages waste-to-energy and renewable energy sources such as
